1. Executive Summary

Peart Serenity Residence is a premium senior care and wellness residence to be established in Montego Bay, Jamaica. The project pairs professional nursing care with the warmth of Caribbean hospitality, creating a safe, dignified, and emotionally supportive home for elderly residents. It is founded on the principal's nursing experience and years of living in Jamaica, combined with a deep commitment to raising the standard of elder care on the island.

Jamaica is aging rapidly. By 2025 roughly 17% of the population — close to 400,000 people — are aged 60 and over, while life expectancy has climbed to the mid-70s. Demand for trustworthy, professionally run residential care far exceeds the small supply of quality facilities, particularly in the Montego Bay region. Families locally and abroad are actively seeking dignified care they can rely on for their parents and relatives.

The business will launch as a boutique 6-bed pilot residence operating from a leased, renovated home, focused on premium, personalized care rather than volume. Starting at 6 beds keeps capital and risk low while the brand proves its care quality and reputation; once occupancy and trust are established, the model expands to 12 beds (Phase 2), where economies of scale materially improve margins. Revenue is generated through monthly residential fees, private premium suites, respite and post-surgery recovery stays, and day-care services.

THE ASK

We are seeking USD \$150,000 in startup capital to launch a 6-bed premium senior residence in Montego Bay. Funds cover renovation, medical equipment, licensing, branding and signage, launch marketing, and an operating reserve. The pilot is designed to validate the model and build reputation; expansion to 12 beds (Phase 2) is where the business reaches healthy, scalable profitability.

Financial Snapshot (USD)

Metric	Year 1	Year 2	Year 3
Average occupancy	55%	78%	92%
Total revenue	\$140,000	\$197,000	\$232,000
Operating costs	\$190,000	\$208,000	\$216,000
EBITDA	(\$50,000)	(\$11,000)	\$16,000
Residents (avg of 6)	3.3	4.7	5.5

Figures are planning estimates based on local market pricing and benchmarked operating costs; they should be validated against final lease and staffing terms.

2. Company & Concept

Peart Serenity Residence will operate as a licensed residential and assisted-care facility for seniors. The concept is built on a simple promise: professional healthcare delivered with genuine human warmth, in a setting that feels like home rather than an institution.

What We Offer

- **Long-term residential care** — a permanent, supervised home for seniors needing daily assistance.
- **Temporary & respite stays** — short-term care that gives family caregivers reliable relief.
- **Day-care services** — supervised daytime care, activities, and meals for non-resident seniors.
- **Post-surgery recovery** — clinically supported rehabilitation in a comfortable residential setting.
- **Specialized elderly support** — diabetes, hypertension, mobility, and early-stage Alzheimer's care.
- **Wellness & recreation** — structured programs that nurture body, mind, and social connection.

Who We Serve

The residence targets three core customer groups: Jamaican families seeking quality care for elderly relatives; overseas Jamaicans financing care for parents back home; and expatriates and retired foreign residents living in or relocating to Jamaica. Each group shares the same need — dependable, dignified, professional care with transparent communication.

3. Mission, Vision & Values

Mission

To provide compassionate, safe, and professional care that improves the physical, emotional, and social wellbeing of every elderly resident in our home.

Vision

To become Jamaica's most trusted and respected senior wellness and assisted-living brand — a benchmark for dignity, professionalism, and Caribbean warmth.

Core Values

Value	What it means in practice
Compassion	Every interaction is led by empathy and genuine care.
Dignity	Residents are treated as valued individuals, never as patients to be processed.
Professionalism	Trained staff, clinical standards, and accountable processes.
Safety	Secure environments, emergency readiness, and rigorous protocols.

Respect

Cultural, religious, and personal preferences are honored.

Human Connection

Family communication and social engagement are central,
not optional.

4. The Market Opportunity

Jamaica is experiencing a demographic shift that makes professional eldercare one of the island's most durable long-term opportunities. The 60-and-over population is projected to reach roughly 17% of the national total by 2025, up from about 12% a decade earlier, with life expectancy now in the mid-70s. The number of seniors will continue to grow for decades.

Demand Drivers

- **Aging population** — a structural, multi-decade rise in the number of seniors needing care.
- **Migration of caregivers** — many adult children live and work abroad, unable to provide hands-on care.
- **Overseas remittance funding** — the Jamaican diaspora reliably finances care for parents at home.
- **Limited premium supply** — few high-quality, professionally run facilities exist in Montego Bay.
- **Rising expectations** — families increasingly seek dignified, hospitality-grade care, not just basic custody.

Market Size Indicator

With roughly 400,000 Jamaicans aged 60+ and a tourism-and-retiree hub in Montego Bay/St. James, even a fraction of a percent of regional demand supports multiple premium residences. Local facilities report monthly fees in the range of JMD 250,000–550,000 (approximately USD \$1,600–\$3,500), confirming both willingness to pay and room for a clearly differentiated premium offer.

POSITIONING

Peart Serenity Residence enters as the warm, premium, professionally managed choice — distinguished by clinical credibility, transparent family communication, and a true 'home' environment rather than an institutional one.

5. Services & Care Model

Core Services

- 24/7 nursing supervision and personal care
- Medication management and administration
- Meal preparation and nutrition monitoring
- Medical follow-up and visiting-physician coordination
- Physiotherapy and rehabilitation coordination
- Emotional and social support / companionship

Specialized Services

- Diabetes care and monitoring
- Hypertension management
- Mobility assistance and fall prevention
- Early-stage Alzheimer's and dementia support
- Post-operative recovery and wound care coordination

Wellness & Activities

Daily life at the residence balances care with engagement: light exercise and guided stretching, music therapy, cognitive games and reading, gardening, arts and crafts, social gatherings, and movie afternoons. Premium experiences include Caribbean cultural activities, scheduled family video calls, birthday and holiday celebrations, religious support, and relaxation therapy.

6. Pricing & Revenue Streams

Pricing reflects a premium, personalized positioning while remaining competitive with regional rates. A blended mix of long-stay residents, private suites, respite, recovery, and day care diversifies revenue and stabilizes cash flow.

Plan / Service	Rate (USD)	Notes
Day Care	\$40 – \$60 / day	Daytime supervision, meals, activities
Weekly Respite Stay	\$550 – \$900 / week	Short-term relief for family caregivers
Shared Residence (monthly)	\$1,900 – \$2,600 / mo	Long-term care, shared room
Private Premium Suite	\$3,200 – \$5,000 / mo	Private room, enhanced services
Post-Surgery Recovery	\$140 – \$250 / day	Clinically supported rehabilitation

Revenue Streams

- **Monthly residential fees** — the recurring core of the business.
- **Private premium packages** — higher-margin suites and bespoke care.
- **Respite & recovery stays** — high-value short-term revenue that fills capacity.
- **Day-care services** — incremental revenue without occupying a bed overnight.
- **Specialized medical support** — add-on services billed above base care.

7. Facility, Equipment & Operations

The residence will operate from a leased, renovated residential home adapted for accessibility and safety — a model that delivers a genuine home environment at a fraction of the cost of new construction or purchase.

The identified property is leased at a current rent of JMD 100,000 per month (approximately USD \$633), a major cost advantage that keeps fixed overhead low and supports the lean pilot economics. The lease term and any future escalation should be secured in writing as part of the launch plan.

Infrastructure Requirements

- Accessible bedrooms and wide doorways
- Adjustable medical beds
- Anti-slip bathrooms and wet rooms
- Handrails and safety systems throughout
- Dining and recreation areas
- Outdoor gardens and relaxation spaces

Essential Equipment

- Wheelchairs and walkers
- Blood-pressure and vital-sign monitors
- Oxygen equipment
- Emergency response kits
- Security cameras (CCTV)
- Backup generator and water reserve

Operating Standards

Operations are governed by written care protocols, medication logs, infection-control and cleaning schedules, emergency procedures, and a family-communication cadence. Quality is monitored through resident wellbeing reviews, incident tracking, and regular family feedback.

8. Organization & Staffing

A lean, qualified team delivers consistent, accountable care. The initial structure is sized for the 6-bed pilot and scales as the residence expands toward 12 beds. The founder — a nurse — serves as Administrator and clinical lead, which keeps early payroll lean while ensuring hands-on care quality.

Role	Function	Initial count
General Administrator (founder)	Operations, compliance, clinical lead, family liaison	1
Registered Nurse	Clinical supervision, care planning	1
Nursing Assistants	Daily personal care (shift coverage)	3

Visiting Physician	Medical oversight (retainer)	1 (contract)
Physiotherapist	Rehabilitation (part-time)	1 (contract)
Nutrition Specialist	Meal planning (part-time)	1 (contract)
Cook	Meal preparation	1
Cleaning & Laundry	Hygiene and housekeeping	1
Security	Site safety (night + CCTV)	1

Salary Estimates by Role (Montego Bay)

The estimates below reflect how wages are moving in the Montego Bay / St. James market today. Jamaica's national minimum wage rose to JMD 16,000 per 40-hour week ($\approx$ JMD 69,000 / month) effective June 2025, which sets the floor for support roles. Skilled clinical staff command significantly more, and a tight nursing labour market — with many nurses migrating abroad — is pushing registered-nurse pay upward. As a premium residence, Peart Serenity Residence budgets at or slightly above local market rates to attract and retain quality caregivers. Figures are gross monthly ranges (before statutory employer contributions); USD shown at USD/JMD $\approx$ 158.

Role	Count	Salary (JMD / month)	Salary (USD / month)
General Administrator (founder)	1	J\$250,000 – J\$380,000	\$1,600 – \$2,400
Registered Nurse	1	J\$200,000 – J\$300,000	\$1,250 – \$1,900
Nursing Assistant	3	J\$90,000 – J\$140,000	\$570 – \$890
Visiting Physician (contract)	1	J\$180,000 – J\$300,000	\$1,140 – \$1,900
Physiotherapist (part-time)	1	J\$100,000 – J\$160,000	\$630 – \$1,010
Nutrition Specialist (part-time)	1	J\$80,000 – J\$130,000	\$505 – \$820
Cook	1	J\$90,000 – J\$130,000	\$570 – \$820
Cleaning & Laundry	1	J\$75,000 – J\$110,000	\$475 – \$695
Security	1	J\$80,000 – J\$120,000	\$505 – \$760

Estimated total monthly payroll for the 6-bed pilot is approximately USD \$10,000–\$12,000 (roughly JMD 1.6M–1.9M). Add ~12–13% for statutory employer contributions (NIS, NHT, HEART, and education tax). Because the founder operates the home as Administrator and clinical lead, early payroll is kept lean; contract clinicians (physician, physiotherapist, nutritionist) are engaged on retainers/visits rather than full salaries. Headcount grows as the residence expands toward 12 beds.

Salary ranges are planning estimates compiled from current Jamaican market data (PayScale, ERI SalaryExpert, WorldSalaries, and the 2025 minimum-wage update); they should be confirmed with local recruitment at hiring time. Premium positioning, ongoing training, and a positive caregiving culture are treated as core investments — they directly drive resident wellbeing, reputation, and occupancy.

9. Marketing & Customer Acquisition

Marketing combines emotional, trust-building storytelling with targeted digital reach to families at home and abroad. A detailed channel and campaign plan accompanies this document; the summary below captures the core approach.

Channels

- **Social media** — Facebook, Instagram, and TikTok with emotional, professional content.
- **Search & local presence** — a professional website and Google Business profile.
- **Diaspora targeting** — paid campaigns reaching Jamaicans abroad financing parents' care.
- **Referral partnerships** — hospitals, clinics, physicians, and discharge planners.
- **Education content** — healthy-aging and caregiving content that builds authority and trust.

BRAND MESSAGE

“Professional care with warmth, dignity, and compassion.” — Where Care Feels Like Home.

10. Competitive Landscape

Montego Bay has a handful of existing eldercare providers, but few combine clinical credibility, a premium home-like environment, and strong family communication. Peart Serenity Residence differentiates on experience quality, transparency, and brand trust.

Differentiator	Typical local provider	Peart Serenity Residence
Environment	Institutional / basic	Premium, home-like villa
Family communication	Ad hoc	Structured updates & video calls
Care model	Custodial	Clinical + wellness + emotional
Brand & trust	Limited	Defined identity, testimonials, online presence

Diaspora focus

Minimal

Core marketing strategy

11. Financial Plan

The model is built for disciplined growth: launch lean as a 6-bed pilot, prioritize care quality and reputation, and reach near break-even before expanding. At full occupancy the 6-bed pilot (6 residents plus day care and ancillary revenue) generates roughly USD \$21,000 in monthly revenue. The pilot is deliberately conservative — small homes carry high fixed costs per bed — so the strategic value lies in proving the model and then scaling to 12 beds (Phase 2), where the same overhead is spread across twice the revenue and full-occupancy run-rate rises to roughly USD \$42,000 per month at a healthier margin.

Three-Year Projection (USD) — 6-Bed Pilot

Line item	Year 1	Year 2	Year 3
Average occupancy	55%	78%	92%
Residential & care revenue	\$122,000	\$172,000	\$202,000
Day care & ancillary	\$18,000	\$25,000	\$30,000
Total revenue	\$140,000	\$197,000	\$232,000
Staffing costs	\$122,000	\$138,000	\$146,000
Rent (JMD 100,000 / mo)	\$7,600	\$7,600	\$7,600
Facility & utilities	\$22,000	\$24,000	\$26,000
Food, medical & supplies	\$20,000	\$26,400	\$24,400
Marketing & admin	\$18,400	\$12,000	\$12,000
Total operating costs	\$190,000	\$208,000	\$216,000
EBITDA	(\$50,000)	(\$11,000)	\$16,000

Key Assumptions

- **Capacity** — 6 beds (pilot), plus a few day-care slots; expandable to 12 (Phase 2).
- **Blended monthly rate** — approximately \$3,000 per resident across the mix.
- **Rent** — JMD 100,000 / month ($\approx$ USD \$633), fixed by lease.
- **Break-even occupancy** — approximately 85% at 6 beds; materially lower after 12-bed expansion.
- **Cash runway** — the operating reserve funds early-ramp losses until cash-flow turns positive.
- **Currency** — figures in USD; local costs assume USD/JMD $\approx$ 158.

12. Funding Request & Use of Funds

We are seeking USD \$150,000 in startup capital to launch the 6-bed pilot residence and fund operations through the ramp-up period.

Use of funds	Amount (USD)	%
Working capital / operating reserve	\$42,000	28%
Renovation & accessibility adaptation	\$22,000	15%
Medical equipment & adjustable beds	\$20,000	13%
Safety, security & backup power	\$15,000	10%
Furniture & furnishings	\$12,000	8%
Branding, signage, website & launch marketing	\$12,000	8%
Transport vehicle	\$12,000	8%
Contingency	\$8,000	5%
Licensing, permits & legal	\$7,000	5%
Total	\$150,000	100%

Note: the property is leased (JMD 100,000 / month), so no capital is tied up in real estate — keeping the raise low and the operating reserve generous. Investment may be structured as equity, structured debt, or a blended instrument with a profit-share component. A dedicated Supplier & Investor Strategy document details deal structure, expected returns, and partnership options.

13. Risk Analysis & Mitigation

Risk	Mitigation
Licensing & regulation	Engage regulators early; build to Ministry of Health standards from day one.
High operating costs	Lean staffing model, energy efficiency, and occupancy discipline.

Medical liability	Trained staff, clear protocols, insurance, and documented procedures.
Slow occupancy ramp	Operating reserve, pre-launch waitlist, and referral partnerships.
Reputation / online reviews	Service excellence, proactive family communication, testimonials.
Staff turnover	Competitive pay, training, and a positive caregiving culture.

14. Growth Roadmap

- **Phase 1 (Year 1)** — Launch and stabilize the 6-bed pilot residence; build reputation and a referral base.
- **Phase 2 (Years 2–3)** — Expand to 12 beds, reach mature occupancy, and add home-care services and a specialized Alzheimer's unit.
- **Phase 3 (Years 3–5)** — Expand capacity or open a second location; develop medical-tourism partnerships.
- **Phase 4 (Year 5+)** — Standardize operations into a replicable model and explore franchise development.

15. Conclusion

Pearl Serenity Residence is both a sound business and a meaningful social contribution to Jamaica's healthcare and eldercare sector. With the right capital, licensing, staffing, and an uncompromising commitment to care quality, the residence is positioned to become a recognized leader in senior care in Montego Bay — and the foundation of a trusted, scalable brand.

Pearl Serenity Residence — Where Care Feels Like Home.
