

STRATEGY & GROWTH PLAN

Peart Serenity Residence

Positioning, Competitive Strategy & Growth Roadmap

SCOPE 3-Year Strategic Plan

LOCATION Montego Bay, St. James, Jamaica

DOCUMENT Confidential, 2026

TAGLINE Where Care Feels Like Home

1. Strategic Overview

This strategy translates the Peart Serenity Residence vision into a concrete plan for building a defensible, profitable, and scalable senior-care brand in Jamaica. The guiding idea is simple: win on trust and care quality first, then scale deliberately. In a market where families are anxious and supply is thin, a brand that reliably delivers dignity, safety, and warm professional care will command premium pricing and durable demand.

STRATEGIC THESIS

Be the most trusted premium senior residence in western Jamaica. Earn that trust through clinical credibility, transparent family communication, and a genuine home environment — then use reputation as the engine for occupancy, pricing power, and multi-site expansion.

2. Vision, Mission & Strategic Pillars

Vision

To become Jamaica's most trusted and respected senior wellness and assisted-living brand.

Mission

To provide compassionate, safe, and professional care that improves the physical, emotional, and social wellbeing of every resident.

Five Strategic Pillars

Pillar	Strategic intent
1. Care Excellence	Clinical standards and trained staff that families can trust completely.
2. Brand Trust	A premium, warm, recognizable identity backed by testimonials and transparency.
3. Diaspora Reach	Capture overseas Jamaicans financing care for parents at home.
4. Operational Discipline	Lean staffing, occupancy management, and cost control for sustainable margins.
5. Scalable Model	Standardized processes that can be replicated across locations.

3. Market & Positioning

Jamaica's 60+ population is projected to reach roughly 17% of the national total by 2025 (~400,000 people), with rising life expectancy and a large diaspora that funds care for elderly parents. Supply of premium, professionally managed care in the Montego Bay region is limited, leaving a clear gap for a differentiated brand.

Positioning Statement

POSITIONING

For families who want more than basic custody for their elderly loved ones, Peart Serenity Residence is the premium senior care home in Montego Bay that delivers clinical professionalism with Caribbean warmth — because every resident deserves to feel safe, dignified, and at home.

Target Segments

Segment	Need	How we win
Local Jamaican families	Trustworthy daily care nearby	Visible quality, references, open-door visits
Overseas Jamaicans	Reliable care for parents at home	Digital updates, video calls, remote payment
Expatriates / retirees	Quality care in a familiar standard	Premium environment, English-language service
Hospitals & physicians	Safe discharge & recovery option	Referral partnerships, recovery program

4. SWOT Analysis

Strengths	Weaknesses
Founder's nursing background & credibility	New brand without operating history
Premium positioning in an underserved market	High fixed operating costs
Strong diaspora-funded demand	Capital-intensive launch
Caribbean-warmth differentiation	Dependence on skilled-staff availability

Opportunities	Threats
Rapidly aging population	Regulatory / licensing changes
Limited premium competition	New entrants copying the model
Home-care & Alzheimer's unit expansion	Economic / currency volatility
Medical-tourism partnerships	Reputational risk from any care incident

5. Competitive Strategy

The strategy is differentiation, not price competition. Local providers compete on cost and basic custody; Peart Serenity Residence competes on trust, experience, and outcomes. Premium pricing funds the staffing and environment that, in turn, justify the premium — a reinforcing loop.

Sources of Competitive Advantage

- **Reputation moat** — testimonials, reviews, and word of mouth compound over time and are hard to copy.
- **Family-communication system** — structured updates and video calls win diaspora trust.
- **Care protocols & culture** — consistent quality that institutional rivals struggle to match.
- **Brand identity** — a recognizable, premium look and voice across every touchpoint.
- **Referral network** — relationships with hospitals and physicians create a steady pipeline.

6. Go-to-Market Strategy

Phase	Timing	Focus
Pre-launch	Months -3 to 0	Brand build, website, waitlist, referral outreach, soft PR
Launch	Months 1-3	First residents, testimonials, local visibility, paid social
Build occupancy	Months 4-12	Diaspora campaigns, referral partnerships, reputation
Stabilize	Year 2	Mature occupancy, add services, optimize margins
Scale	Year 3+	Second site / capacity expansion, franchise groundwork

7. Operational Strategy

Operational excellence is the foundation of the brand. The plan emphasizes standardized care protocols, disciplined occupancy and cost management, staff development, and rigorous safety and compliance — all documented so the model can be replicated.

- **Standardization** — written protocols for care, medication, hygiene, and emergencies.
- **Occupancy management** — a managed waitlist and respite/day-care to fill capacity.
- **Cost discipline** — lean staffing ratios, energy efficiency, and supplier negotiation.
- **People** — training, fair pay, and a positive culture to retain caregivers.
- **Quality loop** — resident wellbeing reviews, incident tracking, and family feedback.

8. Growth Roadmap

Phase	Horizon	Strategic moves
Phase 1 — Establish	Year 1	Launch 6-bed pilot residence; build reputation and referrals
Phase 2 — Expand	Years 2–3	Grow to 12 beds; mature occupancy; add home-care & Alzheimer's unit
Phase 3 — Replicate	Years 3–5	Second location / added capacity; medical-tourism partners
Phase 4 — Scale	Year 5+	Standardized, replicable model; franchise development

9. Key Performance Indicators

KPI	Year 1 target	Year 3 target
Average occupancy	55%	92%
Total revenue (USD)	\$140,000	\$232,000
EBITDA (USD)	(\$50,000)	\$16,000
Family satisfaction score	≥ 90%	≥ 95%
Staff retention	≥ 80%	≥ 88%
Online rating	≥ 4.5 / 5	≥ 4.8 / 5
Referral-sourced inquiries	20%	40%

10. Strategic Risks & Responses

Risk	Strategic response
Slow occupancy ramp	Pre-launch waitlist, respite revenue, referral partnerships
Cost pressure	Occupancy discipline and efficiency; premium pricing

Regulatory change	Early regulator engagement; build above-standard
Reputation incident	Protocols, insurance, transparent communication
Talent scarcity	Training pipeline, competitive pay, strong culture
Copycat competition	Brand, reputation, and referral moat built early

11. Conclusion

The strategy is deliberately sequenced: build unimpeachable trust and care quality, convert that into occupancy and pricing power, and only then scale. Executed with discipline, Peart Serenity Residence can become the defining premium senior-care brand in western Jamaica and a platform for sustainable growth.

Trust first. Quality always. Scale with discipline.
